1. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Since amended claim 1 discloses the underlying nitride layer formed immediately adjacent to and contacting a top of the deep trench conductor, it is unclear how the sacrificial oxide layer formed underneath the nitride layer as claimed in claim 2. There should be nothing formed between the nitride layer and the top of the deep trench conductor.

2. Claims 1, 4, 5 and 16 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter: The major difference in the claims not found in the prior art of record is an underlying nitride layer formed immediately adjacent to and contacting a top of the deep trench conductor of the capacitor. The capacitor is formed in a deep trench and under a vertical MOSFET.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
